## Fire Station 40, Mountain Meadows

On November 19, 1989, a temporary Fire Station 40 was established in the new Mountain Meadows housing tract in the City of Moorpark at 4185 Cedar Springs Street.

The temporary station opened in a trailer with no water and powered by a mobile generator. It was located on the same site as the permanent station, which was under construction at the time. Station 40 went into service November 16, 1990 as Moorpark's second fire station.

The developer provided the station site as a requirement of the 2,500 unit housing development. The developer also donated much of the exterior architectural façade.

Through the years, Station 40 has housed Hazmat 40 and most recently a Medic/Rescue/Engine (Quint 40).
