

History

Fire Station 30, Civic Center

Fire Station 30 went into operation January 25, 1974. The 8,000 square foot building housed staff offices, an engine and truck company functions.

The central location at 325 West Hillcrest Drive in the City of Thousand Oaks was made possible through the cooperation of the City of Thousand Oaks and the Janss Corp. The Janss Corp donated a number of acres and sold acres to the city.

The city provided the property to build the fire station on at no cost. They also sold the land for the parking lot for \$8,000, which is the price the city paid for the land. Later, the Fire Department purchased a small pie shape property on the east end of the parking lot to increase the parking lot.

The interior of the structure has changed in a number of areas to meet the present needs. The exterior walls were unchanged until 2004 when the one bay east apparatus door opening was expanded to have two bay door openings.

Station 30 was home for the Conejo Dispatch Center that dispatched Battalion 3 and Battalion 4 stations. In 1976, the Conejo Dispatch moved to a department wide communication center in Camarillo.
