

FIRE IS A TOOL NOT A TOY

Home fires can easily start and spread quickly. Knowing what to do can make a huge difference.

FIRE PREVENTION

- ✚ DO NOT play with matches, lighters, candles, or any other flammable materials
- ✚ Make sure there is a smoke alarm on every level of your home and inside each bedroom
- ✚ Check your smoke alarms once a month and know what they sound like
- ✚ Learn and practice your home escape plan - it is important to create and practice an escape plan at least twice a year

FIRE SURVIVAL & TIPS

- ✚ Choose the safest escape route. Get low and crawl out of the house if there is smoke
- ✚ Firefighters can look scary in their gear. Don't hide from them - they are here to help you!
- ✚ If a fire occurs, call 911 and stay at your meeting place
- ✚ If your clothes catch fire - **STOP, DROP, and ROLL**
